

Donovan Legal PLLC × ConnexUS AI — Meeting Minutes

May 13, 2026

Prepared by: Walter White, Liaison to David Pierce

Meeting minutes from the Donovan Legal PLLC and ConnexUS AI kickoff held earlier today. This document captures attendees, decisions, action items, and the revised approach to the donovan.law engagement now that Paul has shipped a substantially complete new website on his own.

Attendees

Name	Role	Organization
Paul Donovan, CPA, Esq.	Founder / Attorney	Donovan Legal PLLC
David Pierce	Project Lead	Tico AI / ConnexUS AI
Elroy Geerdink	Head Engineer	Tico AI / ConnexUS AI
Veronica Pierce	Marketing / Google Ads / Social	Tico AI / ConnexUS AI
Wendy Cardenas	Calendar & Operations Support	Donovan Legal PLLC
Leidy Meza	Support / Operations	Donovan Legal PLLC

Action item: Paul or Wendy to send all attendee email addresses to David Pierce. Email addresses were not exchanged verbally during the call.

Project Entity Structure

The engagement will run through Tico AI as the lead entity, with the ConnexUS AI technology platform powering the agent and CRM stack. The deliberate separation is a Florida Bar advertising and referral-compliance design — Paul is not a customer of an ad agency operating under his name, and the entities driving traffic to donovan.law are separate from the firm.

Major Discovery — Paul Has Already Built Most of the New Site

Paul rebuilt donovan.law himself between the redesign-plan meeting and today. The new site is substantially more advanced than what we proposed in the April redesign plan and reflects a sharper, more specific positioning than the version we drafted.

What Paul Has Already Shipped

- New positioning tagline: "A tax-first practice focused on real estate."
- Four-pillar practice structure: Tax Planning, Tax Compliance, Tax Controversy, Real Estate — organized around the tax position lifecycle, not subject-matter silos
- Custom SVG lifecycle wheel — outer ring (Planning · Compliance · Controversy) and inner ring (Acquisition · Ownership · Disposition) with "One Firm" at the center
- "Donovan-Structured. Donovan-Defended." callout — written tax opinions are defended through examination at no additional engagement charge
- Full Engagement Levels page with three tiers — Gold, Platinum, Reserve — each scoped by Acquisition / Ownership / Disposition phases
- Bio page with full credentials: JD (Suffolk cum laude), CPA (MA), CCM, Licensed RE Broker (MA), bars in FL + MA + SCOTUS + 1st Circuit + D. Mass.
- First-Circuit reversal case (Donovan v. Massachusetts Parole Board, No. 23-1810) prominently featured
- Authority Magazine pull quote on the homepage establishing the bilingual numbers-and-words CPA-attorney positioning
- Seven interactive tax and real estate tools (1031 calculator, FIRPTA withholding, capital gains, cost segregation, rental analyzer, OIC RCP estimator, IRS notice guide)
- Five tax-notes blog posts already live
- Team pages for Wendy Cardenas and Leidy Meza
- Contact page with structured intake form, office address, phone, email, fax, and pre-contact legal notice

What Is Still Unfinished on donovan.law

- /gold/, /platinum/, and /reserve/ tier landing pages are blank white pages — nav links to them go to empty placeholders

- No calendar or scheduling widget anywhere on the site (no Calendly, Cal.com, Acuity)
- No AI voice agent or chat concierge
- No CRM integration on the contact form
- Blog has five posts but no newsletter signup, no downloads, no FAQ
- Three blog post dates are future-dated (October–November 2026)
- Footer is one line only — no social, no nav, no phone, no NAP
- No analytics scripts visible
- No TCPA consent language anywhere
- No Florida Bar attorney-advertising disclaimers visible
- Tech stack is hand-coded static HTML with Bootstrap 4 and jQuery — works, but limits the interactive layer we want to add

Revised Strategic Posture

We are no longer rebuilding donovan.law. We are enhancing what Paul has built. Our work concentrates on the four highest-leverage gaps: the AI voice concierge with intake funnel, the calendar booking and CRM integration, the Florida Bar advertising compliance layer, and the three blank tier pages. The visual redesign is shelved.

Project Goal

Drive qualified, high-net-worth traffic to donovan.law, screen it aggressively through an AI voice concierge, and book qualified prospects directly onto Paul's calendar. Twenty bookings per month is the Phase 1 target. At a 20% close rate, that translates to roughly forty-eight new clients in Year 1; Paul believes he can outperform that to reach approximately one hundred new clients per year at his target client profile.

Decisions Made

Intake & Booking

- Retainer is collected AFTER calendar booking, not before
- Phase 1 single goal: AI agent intake that books a qualified consultation onto Paul's calendar
- Phase 2: secondary virtual rep handles post-call callbacks for no-shows
- Consultations are 30 minutes
- Two intake funnels on the same site: Tax Planning funnel and Tax Controversy funnel — visitors self-select
- Hook-side ad creative emphasizes Tax Controversy because problem-aware buyers convert faster and frequently become Planning clients after resolution
- Menu-based engagement letter automation — eventual Phase 2 goal: visitor picks services, system auto-generates engagement letter via DocuSign / Adobe Sign API

Client Profile and Disqualifiers

Funnel	Qualifier	Notes
Tax Planning	Income \$1M+ (ideal \$2–5M), net worth \$10M+	Roughly 1–2M qualifying individuals nationwide
Tax Planning	Real estate investor or interested in real estate	Does NOT need to currently own real estate — Paul can introduce them to it
Tax Planning	W-2 earners in high-tax states (NY, CA, MA)	Short-term-rental and material-participation strategies
Tax Planning	International / inbound foreign capital into U.S. real estate	FIRPTA and cross-border structuring — strong fit
Tax Controversy	Minimum \$250K owed in	Pre-controversy,

	income, sales, or employment tax	controversy, and post-controversy matters
Disqualifier	H-1B visa holders	Too unstable, unpredictable U.S. tenure
Disqualifier	Undocumented status	Not a fit
Disqualifier	Below income/asset thresholds with no controversy matter	Polite handoff or decline
Disqualifier	Behavioral red flags (instability, grandiose claims)	Paul has seen 'backwoods crackers claiming wealth' — needs screening

International clients, multiple-passport holders, and green-card holders are NOT disqualifiers — these are often the most lucrative engagements due to FIRPTA and cross-border planning complexity. Paul will produce a complete disqualifier list for Veronica before the next meeting.

Technology Stack

Layer	Decision	Owner
CRM	GoHighLevel (GHL) — natively integrated with Connexus AI; Paul gets logins for visibility	Elroy
AI Voice Concierge	Connexus AI SDK (proven on advisoryconnect.net) — adapted for tax-law intake	Elroy
Calendar	Embedded in GHL — replaces the missing scheduling widget on donovan.law	Elroy
Business phone	New business line with SMS provisioned for GHL workflows	Elroy
Fax	Paul keeps RingCentral fax (IRS and state authorities still require fax)	Paul
E-signature	Existing DocuSign + Adobe Sign — hit via API for engagement letters	Paul
Legal practice management	Paul currently on Lawbility;	David

	David will evaluate Clio vs Lawbility API quality	
Compliance posture	SOC 2 + PII isolated environment; encryption keys held by client	Elroy
Call recording	Enabled during proof-of-concept; disabled post-validation to protect attorney-client privilege	Elroy

Marketing & Compliance

- Primary channel: Google Ads — establishes a measurable baseline before opening other channels
- Ad account of record: Tico AI (not Paul Donovan and not Donovan Legal PLLC) — entity separation protects the firm under Florida Bar advertising rules
- Florida Bar review: Paul will forward the Florida Bar advertising rules and the referral-agency registration requirements; David and team will register Tico AI as a referral agency if required
- TCPA: full consent language on every intake step before any outbound contact or voice agent initiation
- Funnel design: all paid traffic lands on donovan.law (Paul's URL, his owned funnel) — the ad agency drives traffic TO the site, not directly to v-reps; this is the legal architecture
- Veronica to develop additional URLs and creative variants for social channels once Google baseline is established
- Possible second-front: retool advisoryconnect.net (David's site, already on the Connexus voice agent) as a separate ad-traffic landing platform that funnels qualified leads into Donovan Legal

Membership / Engagement Tiers

Paul has fully scoped the three-tier engagement model and shipped it to donovan.law/engagement.html. Tiers, scopes, and behaviors are confirmed as follows:

Tier	Concierge Behavior	Tier Cap
Gold — Trusted Counsel	Routed via concierge to Wendy / calendar	Unstated
Platinum — Strategic Partner	Routed via concierge to	100 members, by application

	Wendy / calendar	
Reserve — Donovan Reserve	Identifies as Reserve client — concierge transfers directly to Paul's mobile, 24/7	100 members, hand-selected, numbered 001–100, physical black card

Pricing is not disclosed publicly — fees are set during the confidential consultation. The /gold/, /platinum/, and /reserve/ subpages on donovan.law are currently empty and need to be built out.

Concierge / V-Rep Architecture

The ConnexusUS AI agent will operate as a 24/7 receptionist plus intake specialist.

Routing logic agreed in the meeting:

1. Inbound caller or website visitor reaches the concierge
2. Concierge asks identifying question: existing client or new prospect?
3. If existing client and self-identifies as Reserve (member numbers 001–100): direct transfer to Paul's mobile, 24/7
4. If existing Gold or Platinum: route to Wendy for calendar coordination
5. If new prospect: run two-funnel intake — Tax Planning path or Tax Controversy path
6. Qualify against income / net-worth / amount-owed thresholds
7. Apply disqualifier screen (H-1B, undocumented, behavioral)
8. If qualified: book a 30-minute consultation on Paul's calendar via GHL
9. If unqualified: polite decline with an automated written follow-up resource
10. After call: confirmation SMS and email sent; reminders scheduled; no-show triggers the secondary v-rep callback in Phase 2

KPIs and Targets

Metric	Phase 1 Target	Note
Bookings per month	20	30-min slots; Paul's solo calendar capacity
Close rate	20%	Yields ~48 new clients per year at the booking target
Year 1 new clients	100	Paul's stretch goal
Channel mix at launch	Google Ads only	Establish baseline before adding channels
Cost-per-qualified-booking	TBD	Will be reset after first 30 days of spend data

Timeline

Milestone	Timing	Owner
Documents distributed to all attendees	Today, May 13, 2026	David
Attendee email roster	Today / tomorrow	Wendy / Paul

collected		
Document feedback returned to David	Within 1 week	Paul, Wendy, Leidy, Veronica, Elroy
Next full team meeting	May 20, 2026 (approximately)	David to schedule
Proof-of-concept agent demo	Approximately May 27, 2026	Elroy
Deployment to donovan.law	Approximately June 3, 2026	Elroy
Cadence beyond launch	Every 2 weeks	Standing

Action Items

Paul Donovan

1. Forward all attendee email addresses to David (or delegate to Wendy)
2. Forward the Florida Bar advertising rules and the referral-agency registration requirements
3. Produce the disqualifier criteria document for Veronica (income, behavior, status, anything else)
4. Build out the intake script — exactly what the concierge must ask in order to qualify and book a consultation
5. Decide whether to expose pricing tiers publicly or keep them gated behind a consultation (Paul taking time to think)
6. Provide DocuSign and Adobe Sign API access for engagement-letter automation

David Pierce

1. Distribute the full document set today
2. Research the Florida Bar referral-agency registration requirements for Tico AI
3. Evaluate Clio vs Lawbility API capabilities and recommend the practice-management platform
4. Schedule the next meeting one week out
5. Confirm ad-account-of-record structure (Tico AI) with the team
6. Establish KPI dashboard before launch

Elroy Geerdink

1. Read the full document set and review donovan.law line by line
2. Architect the GHL deployment including isolation, encryption keys handed to Paul, SOC 2 posture, PII handling
3. Provision the new business phone line with SMS capability
4. Design the Connexus AI voice agent intake flow for the two funnels (Planning vs Controversy)
5. Build the calendar integration into the donovan.law site (or deploy an embedded GHL widget)
6. Prepare a proof-of-concept demo for the next meeting

Veronica Pierce

1. Review documents and Paul's disqualifier list once received
2. Draft Google Ads campaign structure for the Tax Planning and Tax Controversy funnels
3. Develop creative concepts for social channels — focused on big-fish hooks for the HNW profile
4. Coordinate with Paul on the Florida Bar advertising review process before any creative goes live

Wendy Cardenas & Leidy Meza

1. Maintain Paul's calendar and define availability windows
2. Document operating procedures for concierge → calendar handoff
3. Review the document set and return feedback to David within the week
4. Help Paul finalize the intake script from the operations perspective
5. Document Paul's intake KPI goals so the team is aligned on success criteria

Decisions Deferred to Next Meeting

- Public vs gated pricing on the engagement tier pages
- Whether to fund the build-out of /gold/, /platinum/, /reserve/ in Phase 1 or defer to Phase 2
- Whether to retool advisoryconnect.net as a parallel ad landing platform for Donovan Legal
- Final practice-management decision (Clio vs Lawbility vs alternative) pending David's API review
- Whether call recording defaults to OFF immediately or stays ON only through proof-of-concept

Quote of the Meeting

Paul Donovan: "We gotta move out of the foxhole." The line captures the agreed direction — turn the solo practice into something that feels like a fifty-person firm, without the headcount.

Respectfully submitted,

Walter White
